The Economic Outlook to 2015

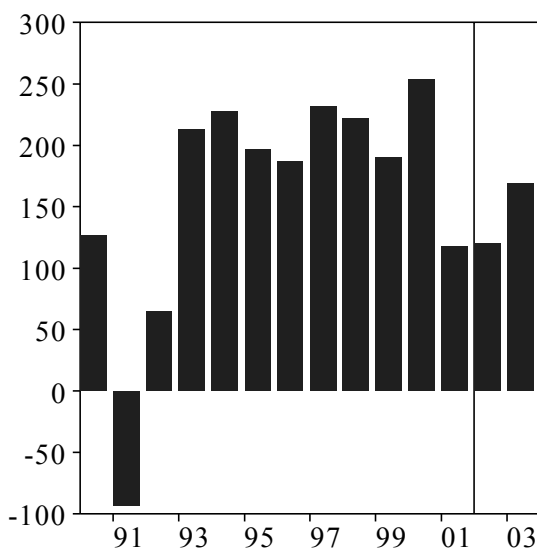

David G. Lenze

Florida will post little growth in employment and sales in 2002. The mild recession of 2001 has been succeeded by a mild recovery in the first half of 2002. Although the economy should strengthen in the second half of the year, it won't be until 2003 before the major economic aggregates resume their customary growth. Over the longer term, the pace of job creation will slacken as Florida's population growth converges toward the lower national rate. Gathering momentum in the national economy in 2010 and 2011 is choked off by higher interest rates in 2012. An inflationary boom is averted at the cost of somewhat weaker than trend growth that year. This shows up as a mild "growth cycle" in Florida's construction sector.

The State Outlook

Florida did not lose any jobs in the recession of 2001 when the data are examined on an annual average basis (Figure 1). The state actually managed to eke out a gain of 118 thousand jobs, very close to our forecast of 124 thousand jobs. Just like the recovery from the 1990-91 recession, the current recovery is not generating large numbers of new jobs. We foresee a gain of only 120 thousand jobs in 2002 and most of these will be formed in the second half of the year. Growth accelerates next year to 169 thousand jobs, a gain that is still far below job growth in the mid to late 1990s when gains averaged 215 thousand per year.

Figure 1. - Employment growth
(change from previous year, in thousands of jobs)

Florida's unemployment rate converged on the national rate in 2001. It averaged 0.3 percentage points less in the previous five years. We forecast that Florida will continue to match the national unemployment rate in 2002 and 2003. The U.S. rate rises to 6.0 percent in 2002 and then falls to 5.7 percent in 2003. Preliminary monthly data for 2002 seem to indicate that such a forecast may perhaps be too pessimistic for Florida and that it is possible that a stronger state economy could bring its unemployment rate a few tenths of a percentage point below the national rate as early as this year.

Population growth slowed in 2001 and will slow further this year. The state will add 289 thousand residents in 2002, the first time population growth has fallen below 300 thousand in five years. Population growth will be the same in 2003; the accelerating job growth in that year will not draw more in-migrants to the state until 2004.

The recession held real personal income growth to only 2.6 percent in 2001. As the recovery gathers strength, income growth accelerates to 3.3 percent in 2002 and 4.4 percent in 2003.

The robust housing sector continues to amaze observers and will perhaps propel starts in 2002 above the last year's already high level. We expect 169,500 units to be started. Eventually demographic reality must reassert itself in the marketplace. The forecast assumes this happens next year with starts plummeting to 144 thousand in 2003.

Real taxable sales barely registered an increase in 2001, increasing less than \$1 billion. Sales will increase \$2.5 billion in 2002 but not until next year will the gains resemble growth of the 1990s. Real taxable sales will grow nearly \$10 billion in 2003.

The Long-Term Outlook

From now until 2015, the strongest job growth in the state will occur in 2004—just over 200 thousand jobs. Growth slows over time as both population growth slows and an aging population begins to retire. During 2011-15 job growth averages only 107 thousand per year, a pace below that experienced in the recession of 2001. Florida's economy in 2011-15, however, remains healthy.

The vigorous job growth of 2004 leads to the biggest drop in the unemployment rate—to 5 percent—from its recessionary peak. Unemployment hovers at 5 percent of the civilian labor force for the next several years as steady economic growth provides just enough jobs for new entrants to the labor force. The national forecast used to drive the Florida forecast includes a mild growth cycle with a spurt of growth 2010-2011 followed by several weaker years. The spurt of growth drives Florida's unemployment to 4.1 percent briefly before it climbs back to 4.5 percent. This cycle is not strong enough to set record low unemployment rates as the surge in growth at the end of the 1990s did.

The peak year for population growth occurs in 2005 when the state adds 324 thousand residents. This peak is one year after the peak in job growth, reflecting the lagged relationship that has historically existed between population and job growth. After this peak, population growth dwindles nearly every year until falling to 253 thousand in 2015.

Real income growth averages nearly 4 percent per year over the long run (2001-15). Particularly strong growth occurs in 2004 (4.7 percent) and in 2011 (4.5 percent). Strong growth in the earlier year is part of the recovery from last year's recession. Strong growth in 2011 is due to the mild growth cycle in the national forecast.

In the long run, housing demand is fundamentally a matter of demographics. The forecasted slowdown in population growth, therefore, ought to translate into a slowdown in housing starts as well. To be sure, the demographic trend will be offset to some extent by demand for second homes and a rising need to replace old and obsolescent housing stock. However, instead of a gradual reduction in housing starts over the long term, starts fluctuate between 142 and 149 thousand over the forecast horizon with a brief surge to 162 thousand in 2011 (Figure 2). This surge is an artifact of the growth cycle built into the national forecast.

Real taxable sales will tend to track personal income growth from 2004 onwards but will also respond to the cyclical pattern in housing starts and the cost of financing consumer purchases on credit. Accordingly, after

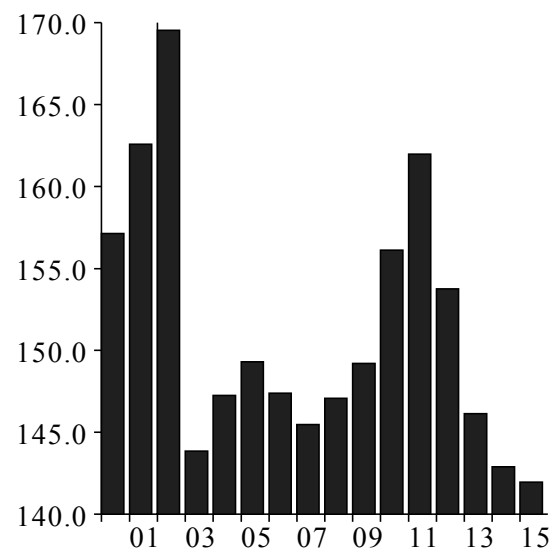

growing by \$14.1 billion in 2011, real taxable sales growth slows to \$12.5 billion in 2012 under the combined influence of weaker income growth, fewer housing starts and higher interest rates. The slowdown is only temporary and real taxable sales growth accelerates in each subsequent year.

County Outlook

A convenient way to briefly summarize the economic outlook for Florida's sixty-seven counties is to group them by their economic bases. Five common and distinctive economic bases are tourism, retirement, mining and manufacturing, farming, and state government. Some of these economic groupings are also geographically similar. For instance, the mining and manufacturing counties (except for Brevard County) are all in north Florida. Most, but not all of Florida's counties, can be classified in one of these categories, some fit into more than one:

- The six counties with the largest shares of wages earned in *tourism*-related industries are Monroe, Nassau, Orange, Osceola, St. Johns, and Walton (tourism-related industries are listed in Table 19.75 of the *Florida Statistical Abstract*.)
- The ten counties with the largest shares of *retirees* (i.e., residents age 65 or more) are Charlotte, Citrus, Flagler, Hernando, Highlands, Indian River, Martin, Pasco, Sarasota, and Sumter.
- The eight counties with the largest shares of wages earned in *mining and manufacturing*

Figure 2. - Housing starts
(thousands)

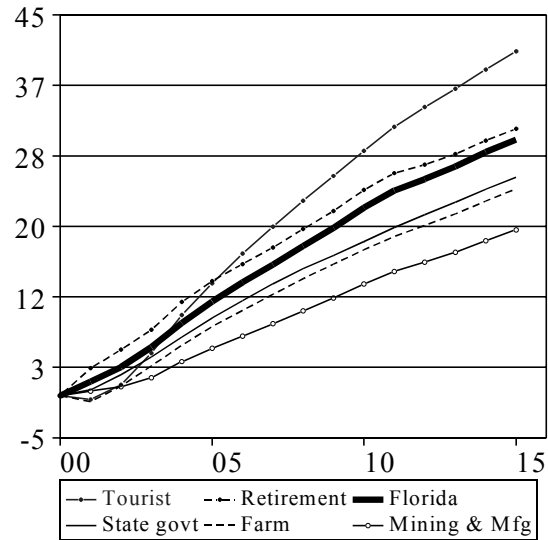

are Bradford, Brevard, Dixie, Hamilton, Madison, Putnam, Taylor, and Wakulla counties.

- The eight counties with the largest shares of *farm* earnings are De Soto, Gilchrist, Glades, Hardee, Hendry, Highlands, Lafayette, and Okeechobee.
- The ten counties with the largest shares of *state government* earnings are Baker, Bradford, Gadsden, Gilchrist, Gulf, Jackson, Leon, Liberty, Union, and Washington.

Despite relatively severe recent job losses, long-term employment growth will be fastest in counties with a large tourism base (Figure 3). Employment will grow 41 percent from 2000 to 2015 in these counties. The strong job performance, however, does not begin until 2003. Counties with a large retirement base also grow relatively fast over this period—32 percent. Unlike the tourist counties they did not lose jobs in last year’s recession. In fact, these counties performed far better than the other four groups.

Employment prospects are weakest for the mining and manufacturing counties. We forecast job growth of only 20 percent from 2000 to 2015. Job growth in farming counties (24 percent) will outpace that of the mining and manufacturing counties over the long-term. However, the farming counties, like the tourist counties, had relatively large job losses in the recent recession. Counties with large state government sectors will grow faster than the farming counties, but not as fast as the statewide average. Statewide job growth will average 30 percent but only 26 percent in counties with a large share of employment in state government.

Figure 3. - Employment growth rate from 2000 (percent)

The Florida Long-Term Economic Forecast is based on a set of econometric models estimated by the Bureau of Economic and Business Research at the University of Florida and a national forecast purchased from DRI-WEFA. The employment totals for the state and counties are consistent with the Agency for Workforce Innovation’s Florida Industry and Occupation Employment Projections 2000-2010.

Data dictionary

Variable	Units	Source	Definition
AHS	p/h	4	Average household size
E	tp	1	Employed persons, civilian
ERNFARM	m\$	9	Earnings, farm
EWS	tj	2	Employment (790) Civilian nonagricultural wage and salary jobs
HH	th	3	Number of permanent resident households - July 1
IRCA	1986-1988=100	8	Value of construction contracts, real
IRDCCVNB	1986-1988=100	8	Value of construction contracts, nonbuilding, real
IRDCCVNRB	1986-1988=100	8	Value of construction contracts, nonresidential building, real (includes hotels)
IRDCCVRB	1986-1988=100	8	Value of construction contracts, residential building, real (excludes hotels)
K	td	11	Residential housing stock, July 1
KF	td	11	Single-family and multifamily housing stock, July 1
KMH	td	11	Mobile home stock, July 1
L	tp	1	Civilian labor force
M	tp	3	Net migration
MFS	td	5	Private housing starts, multifamily
NI	tp	12	Natural increase (births minus deaths)
NSH1	ratio	7	Share of population age 0-4
NSH2	ratio	7	Share of population age 5-14
NSH3	ratio	7	Share of population age 15-19
NSH4	ratio	7	Share of population age 20-39
NSH5	ratio	7	Share of population age 40-54
NSH6	ratio	7	Share of population age 55-64
NSH7	ratio	7	Share of population age 65-74
NSH8	ratio	7	Share of population age 75+
POPA	tp	9	Permanent resident population, July 1, including armed forces
POPA1	tp	3	Population age 0-4, July 1
POPA2	tp	3	Population age 5-14, July 1
POPA3	tp	3	Population age 15-19, July 1
POPA4	tp	3	Population age 20-39, July 1
POPA5	tp	3	Population age 40-54, July 1
POPA6	tp	3	Population age 55-64, July 1
POPA7	tp	3	Population age 65-74, July 1
POPA8	tp	3	Population age 75+, July 1
POPINST	tp	6	Inmates of state and federal institutions
RTSA100	m97\$	10	Real taxable sales
RYPC	t97\$/p	3	Real per capita income
RYTOT	m97\$	9	Real personal income
SFS	td	5	Private housing starts, single-family
TS	td	5	Private housing starts
TSA100	m\$	10	Taxable sales, audited
U	tp	1	Unemployed persons
UR	%	1	Civilian unemployment rate
YADJ	m\$	9	Personal income, adjustment for residence
YERN	m\$	9	Earnings
YIN	m\$	9	Gross commuters' earnings inflows
YLAB	m\$	9	Labor income
YMIL	m\$	9	Earnings, military (active duty, reserves, and national guard)
YNLAB	m\$	9	Nonlabor income
YOUT	m\$	9	Gross commuters' earnings outflows
YPC	t\$/p	3	Personal income per capita

Data dictionary (continued)

Variable	Units	Source	Definition
YPROP	m\$	9	Dividends, interest and rent
YSS	m\$	9	Personal contributions for social insurance
YTOT	m\$	9	Personal income
YTRANS	m\$	9	Transfer payments
YTRCAID	m\$	9	Transfer payments - medicaid insurance payments
YTRCARE	m\$	9	Transfer payments - medicare insurance payments
YTRR	m\$	9	Transfer payments - government retirement
YTRU	m\$	9	Transfer payments - unemployment insurance payments
YTRX	m\$	9	Transfer payments - income maintenance and other
Units:	%	percent	
	m\$	millions of dollars	
	m97\$	millions of 1997 dollars	
	p/h	persons per household	
	t97\$/p	thousands of 1997 dollars per person	
	t\$/p	thousands of dollars per person	
	td	thousands of dwellings	
	th	thousands of households	
	tj	thousands of jobs	
	tp	thousands of persons	

Sources: The following list of the current sources of data used in the *Florida Long-term Economic Forecast—State & Counties* includes a brief description of the adjustments made by the Forecasting Program. Most data are available in machine-readable format and are often more extensive than those published in printed reports. These sources often contain a description of the data, their construction and reliability.

1. Local Area Unemployment Statistics, Agency for Workforce Innovation, <http://www.labormarketinfo.com/laus/LAUS.HTM>. Estimation methodology is described in *BLS Handbook of Methods*, Chapter 4 available on line at <http://stats.bls.gov/opub/hom/homtoc.htm>.
2. Current Employment Statistics, Agency for Workforce Innovation, <http://www.labormarketinfo.com/ces/ces.htm>. Estimation methodology is described in *BLS Handbook of Methods*, Chapter 2 available at <http://stats.bls.gov/opub/hom/homtoc.htm>. The Current Employment Statistics data are for MSAs only. County estimates were prepared by the Bureau of Economic and Business Research.
3. Transformation of other data, e. g.

$$\text{POPA1} = \text{NSH1} * \text{POPA}$$

The implicit price deflator for personal consumption expenditures from the *Survey of Current Business*, Bureau of Economic Analysis, U.S. Department of Commerce is used to deflate income variables.

4. Average household size is from the decennial censuses of population and from the most recent issue of *Florida Population Studies (Number of households and average household size in Florida)*, Bureau of Economic and Business Research, University of Florida. Other years are obtained by linear interpolation.
5. Bureau of Economic and Business Research, University of Florida. (Based on housing permit data published in *Building Permit Activity in Florida*, Bureau of Economic and Business Research, University of Florida and unpublished starts-to-permits ratios from the Bureau of the Census, U.S. Department of Commerce. A description of the permit data can be found in a recent issue of *Current Construction Reports—Housing Units Authorized by Building Permits (C40)*, Bureau of the Census, U.S. Department of Commerce, available at <http://www.census.gov/const/www/C40>.)

Data dictionary (continued)

6. *Florida Estimates of Population*, Bureau of Economic and Business Research, University of Florida.
7. *Florida Population Studies (Population projections by age, sex and race for Florida and its counties)*, Bureau of Economic and Business Research, University of Florida. (The Forecasting Program adjusts the reference date from April 1 to July 1.)
8. *Dodge Local Construction Potentials Bulletin*, F. W. Dodge (current dollar values are deflated by implicit price deflators for residential and nonresidential construction from the *Survey of Current Business*, Bureau of Economic Analysis, U.S. Department of Commerce and then converted to an index, 1986-88 = 100).
9. REIS CD ROM (Regional Economic Information System), Bureau of Economic Analysis, U.S. Department of Commerce, available at <http://www.bea.doc.gov/bea/regional/data.htm>. (Current dollar values are deflated by the implicit price deflator for personal consumption expenditure from the *Survey of Current Business*, Bureau of Economic Analysis, U.S. Department of Commerce, available at <http://www.bea.doc.gov/bea/pubs.htm>.)
10. Florida Department of Revenue unpublished data, <http://sun6.dms.state.fl.us/dor/taxes/distributions.html>. Data are deflated using implicit price deflators from the *Survey of Current Business*, Bureau of Economic Analysis, U.S. Department of Commerce, available at <http://www.bea.doc.gov/bea/pubs.htm>.
11. Bureau of Economic and Business Research, University of Florida. Based on data from the *Census of Housing*, Bureau of the Census, U.S., Department of Commerce; the *Revenue Report*, Florida Department of Highway Safety and Motor Vehicles, <http://www.hsmv.state.fl.us/html/safety.html>, and the *DR-590 N.A.L.* file, Florida Department of Revenue.
12. Florida Department of Health, *Vital News*, published by the Office of Vital Statistics available at http://www.doh.state.fl.us/Planning_eval/Vital_Statistics/VitalNews/vn-index.htm.

Notes

NA Not available, not applicable, not disclosable or not calculable.

All real variables (income, taxable sales, construction values, etc.) are expressed in constant 1997 dollars. *Growth* (or *percent growth*) refers to the total change (or percent change) between two dates and *growth rate* (or *percent growth rate*) refers to the average annual change (or average annual percent change) between two dates. Percent growth rates are compound annual rates between the years indicated.

The permanent resident population includes armed forces and is for July 1. It excludes seasonal residents ("snowbirds") and military stationed overseas who consider Florida their home. The Forecasting Program made adjustments to some small counties to enforce consistency between total population, inmates of state and federal institutions, and group quarters population.

Changes in the method of measuring the unemployment rate for areas cause breaks in its historical comparability in 1973/74, 1979/80, 1989/90 and 1993/1994. Labor force, employed persons, and unemployed persons from 1991-2000 have been revised by the Forecasting Program to be consistent with the population from the 2000 Census.

Much of the raw data received by the Bureau of Economic and Business Research from various statistical agencies has been modified by extrapolation, interpolation, or by other methods to correct anomalies and enforce consistency over time and between the state and counties.

The percent changes in the tables are calculated from unrounded numbers and will sometimes differ from the percent changes calculated from the rounded numbers appearing in the tables. Rounding also accounts for differences between totals and the sum of components. In the cases of employment and taxable sales, the state total does not always equal the sum of the areas because a portion is not allocable to particular areas. The statistical discrepancy for these variables is published on page 497.

Definitions of planning districts and Metropolitan Statistical Areas

Planning districts

District 1 - West Florida

Bay, Escambia, Holmes, Okaloosa, Santa Rosa, Walton and Washington counties

District 2 - Apalachee

Calhoun, Franklin, Gadsden, Gulf, Jackson, Jefferson, Leon, Liberty and Wakulla counties

District 3 - North Central Florida

Alachua, Bradford, Columbia, Dixie, Gilchrist, Hamilton, Lafayette, Madison, Suwannee, Taylor and Union counties

District 4 - Northeast Florida

Baker, Clay, Duval, Flagler, Nassau, Putnam and St. Johns counties

District 5 - Withlacoochee

Citrus, Hernando, Levy, Marion and Sumter counties

District 6 - East Central Florida

Brevard, Lake, Orange, Osceola, Seminole and Volusia counties

District 7 - Central Florida

De Soto, Hardee, Highlands, Okeechobee and Polk counties

District 8 - Tampa Bay

Hillsborough, Manatee, Pasco and Pinellas counties

District 9 - Southwest Florida

Charlotte, Collier, Glades, Hendry, Lee and Sarasota counties

District 10 - Treasure Coast

Indian River, Martin, Palm Beach and St. Lucie counties

District 11 - South Florida

Broward, Miami-Dade and Monroe counties

Metropolitan Statistical Areas

Daytona Beach MSA

Flagler and Volusia counties

Ft. Lauderdale MSA

Broward County

Ft. Myers-Cape Coral MSA

Lee County

Ft. Pierce-Port St. Lucie MSA

Martin and St. Lucie counties

Ft. Walton Beach MSA

Okaloosa County

Gainesville MSA

Alachua County

Jacksonville MSA

Clay, Duval, Nassau and St. Johns counties

Lakeland-Winter Haven MSA

Polk County

Melbourne-Titusville-Palm Bay MSA

Brevard County

Miami MSA

Miami-Dade County

Naples MSA

Collier County

Ocala MSA

Marion County

Orlando MSA

Lake, Orange, Osceola and Seminole counties

Panama City MSA

Bay County

Pensacola MSA

Escambia and Santa Rosa counties

Punta Gorda MSA

Charlotte County

Sarasota-Bradenton MSA

Manatee and Sarasota counties

Tallahassee MSA

Gadsden and Leon counties

Tampa-St. Petersburg-Clearwater MSA

Hernando, Hillsborough, Pasco and Pinellas counties

West Palm Beach-Boca Raton MSA

Palm Beach County
